Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 9 is rejected under 35 U.S.C. 102(b) as being anticipated by Bahl et al. (EP 0 788 090 A2).

As to claim 9, Bahl teaches a speech processing system for transcribing an input speech signal, comprising receiving different classes of speech data, identifying the class for the input speech and selecting a speech processing model accordingly, where the model varies according to the class of the input data (abstract; Fig.5).

Allowable Subject Matter

Claims 1-8, 10, 11 and 13 are allowed.

Claim 14 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: the claims are allowable because, bahl doesn't teach the models selected as recited in the claim.

Response to Arguments

Applicant's arguments, with respect to claim 1 and the corresponding dependent claims have been fully considered and are persuasive. The rejection therefore has been withdrawn.

However the rejection regarding claim 9 is maintained, because changing the speech processing according to the input data is taught by Bahl.
